DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I in the reply filed on 30 June 2006 is acknowledged.

2. Claims 1-8 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Election was made **without** traverse in the reply filed on 30 June 2006.

Specification

3. The disclosure is objected to because it contains an embedded hyperlink and/or other form of browser-executable code. Applicant is required to delete the embedded hyperlink and/or other form of browser-executable code. See MPEP § 608.01.

4. The disclosure is further objected to because Applicant attempts to incorporate by reference that which is taught in the above mentioned hyperlink, which is not permitted. See 37 CFR 1.57(d).

Claim Objections

5. Claim 13 is objected to because of the following informalities: the phrase "said powder" is improper since claim 9 from which it depends does not teach the use of powder. Appropriate correction is required.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3765

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 9-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Woodall et al (2002/0182962).

Woodall teaches a method making a moisture-absorbing material (Paragraphs 20-25; Figure 4; Paragraph 30) comprising providing cotton, drying while mixing a powder of sodium bicarbonate and citric acid, combing, stretching, twisting, and compressing, resulting in a structure wherein a dried-in strain of the cotton is greatest along the elongated direction. In regards to reactions creating water and gas, all are inherent properties of the powder. Likewise, the powder inherently does not react with the cotton.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Woodall et al (2002/0189484), Woodall et al (6802260), Woodall et al (6561023), Pearson (4552803), and Hatch (TEXTILE SCIENCE) all teach what is well known in the art.
